

Convert Price Per M to Price Per Sheet or Price Per Carton

If you are not in the paper world, it might be confusing to see pricing on **clampitt.com** as **Per M (/M)**. Fear not, we are here to help!

Most commonly in the paper & printing world, paper is priced by the thousand sheets. As you are browsing & you see a price with **/M** next to it. **M = 1,000 sheets**. So the price is listed **/ 1,000 Sheets**.

Here is how to convert that to a Price / Sheet:

$$\$6,828.83 / M = \frac{\$6,828.83}{1,000 \text{ sheets}} = \$6.83 \text{ per sheet}$$

Convert Price Per M to Price Per Sheet or Price Per Carton

Here is another example:

	28x40 80# WHITE MCCOY MATTE COVER 10% RECYCLED FSC 400/ CTN V- 3735	White	Matte	80	28" x 40"	Inventory available	1854.85/M	1/Sheets	ADD TO CART
---	--	-------	-------	----	-----------	------------------------	-----------	----------	--------------------

$$\$6,828.83 / M = \frac{\$1,854.85}{1,000 \text{ sheets}} = \$1.85 \text{ per sheet}$$

And an example for cut size and to figure out carton pricing:

	8.5x11 70# CANARY HAMMERMILL SPRINGHILL OPAQUE SMOOTH TEXT 10% RECYCLED 4000/CTN 024159	Canary	Smo	70	8 1/2" x 11"	Inventory available	53.64/M	4000/Sheets	ADD TO CART
---	--	--------	-----	----	--------------	------------------------	---------	-------------	--------------------

4,000 Sheets / Carton

$$\$53.64 / M = \frac{\$53.64}{1,000 \text{ sheets}} = \$0.05364 \text{ per sheet}$$

$$53.64 \div 1000 = 0.05364$$

$$\$0.05364 \text{ per sheet} \times 4,000 = \$214.56 \text{ per carton}$$

$$0.05364 \times 4000 = 214.56$$

OR

$$\$53.64 \text{ (Price / 1,000 sheets)} \times 4 \text{ (there are 4,000 sheets / carton)} = \$214.56 \text{ per carton}$$
