Clampitt Paper

Original Seed Paper

We take recycled, post-consumer/post-industrial content and turn it into the finest raw pulp available. By adding pigments to the pulp we achieve 22 bright, yet earthy, colors. Original paper is made thick and textured, perfect for letterpress printing or die-cutting.

Approximate Germination Rate: >75%

Color: Your choice of 22 colors (see chart on right)

Planting Instructions

We encourage you to get creative with your planting instructions. Our handmade seed paper is packed with seeds that are just waiting to burst into flower. This handmade seed paper is embedded with annual and perennial wildflower seeds. Soak the paper in water overnight. Cover with a thin layer of soil and water daily until seedlings are well established. Germination time is 1-3 weeks.

Printing on Seed Paper

Ink-jet printing is recommended. This print method leaves the seeds intact and doesn't compromise the germination rates. If you're not confident with printing on seed paper, we do offer fully customizable, ink-jet printing. Please reach out to **Clampitt Paper** for a quote.
